Media Contact information above.

Staff: 6 full-time

Industry: Legal Technology. Designed for the Alternative Dispute Resolution (ADR) profession.

Product: The centerpiece of ADR Notable, a cloud-based platform for dispute resolution professionals, is a robust note management feature that enables mediators to capture, attribute, link, sort, and otherwise work with the relevant issues and facts of a dispute. The intuitive design enables a mediator to work on the digital Noteboard during a session in a physical or virtual room to generate movement toward agreement among the parties. The mediator can create and amend proposals and when agreement is reached, generate an agreement document, ready for digital or in-person signing.

The platform also provides an array of case and practice management tools for scheduling, timekeeping, reporting, and communicating. Confidential information is stored with increased security protocols, including up-to-date encryption techniques using Microsoft's Azure environment. ADR Notable saves time and provides enhanced security for mediators, but most importantly, it allows mediators to focus on what they do best.

Recognition: Selected by the *National Law Journal* as one of 2020's Emerging Legal Technologies that could change the way legal services are provided.

Cost: After a 90-day free trial, the cost is \$39.99 per user, per month for an unlimited number of cases. Additional plans are provided for single cases and enterprise-level organizations.
